SUMMARY

Experienced UI/UX Designer with 3+ years in B2B enterprise SaaS applications at Jio Platforms. Skilled in end-to-end UX — user research, wireframing, prototyping, and usability testing through to high-fidelity UI and developer handoff. Specialised in enterprise workflow design, design systems, and AI-assisted design workflows, delivering scalable user-centred solutions with measurable operational impact.

EXPERIENCE

Jio Platforms Limited (JPL)

Associate UI/UX Designer

Oct 2022 – Present

Navi Mumbai, India

- Led end-to-end UX design — including user research, wireframing, prototyping, and usability testing — across 12+ enterprise modules, improving overall workflow efficiency by 35%.
- Conducted user research and usability testing with 1,000+ enterprise users, applying journey mapping, persona development, and task-flow analysis to reduce task completion time by 40%.
- Designed 50+ wireframes, prototypes, and dashboards in Figma using progressive disclosure and contextual filtering, increasing usability satisfaction scores by 28%.
- Built and maintained scalable design systems and component libraries for Angular frontend teams — covering design tokens, WCAG 2.1 accessibility audits, and implementation-ready handoff — reducing developer rework by 45%.
- Leveraged AI-assisted design workflows using Cursor AI, Claude, ChatGPT, and Figma AI for rapid ideation, user flow generation, and UI iteration, cutting design cycle time by 30%.

KEY PROJECTS

Supplier Relationship & Vendor Onboarding Platform

Figma, FigJam, ChatGPT, Claude AI

- Led end-to-end UX for a unified B2B supplier onboarding and compliance platform; reduced onboarding timelines by 78% through research-led restructuring, smart validation flows, and simplified user journeys for 500+ suppliers.
- Designed real-time approval dashboards and multi-level routing systems for operational transparency; collaborated with product, engineering, and compliance teams across Agile sprints.

Warehouse Management System (WMS)

Figma, FigJam, Data Visualisation, Angular, HTML, CSS

- Architected UX flows for 8+ modules — inbound, outbound, inventory, picking, packing, dispatch, returns, and configuration — reducing operator error rate by 35% through structured wireframing and iterative usability testing with warehouse floor teams.
- Designed data-heavy operational dashboards and scalable master data interfaces that improved real-time logistics visibility; optimised navigation flows cutting average task steps by 40%.

TECHNICAL SKILLS

UI/UX Design: Figma • FigJam • Adobe XD • Wireframing • Prototyping • Interaction Design • Visual Design • Responsive Design

UX Research: User Research • Usability Testing • User Journeys • Persona Development • Empathy Mapping • Journey Mapping • A/B Testing • Heuristic Evaluation • Stakeholder Interviews

Design Systems: Component Libraries • Design Tokens • Information Architecture • WCAG 2.1 Accessibility Audits • Data Visualisation • Design Documentation

Frontend Technologies: Angular (Basic) • React (Basic) • HTML • CSS

AI Tools: ChatGPT • Claude AI • Cursor AI • Figma AI • Lovable AI • Readdy AI • Antigravity • Prompt Engineering

Methodologies: Agile UX • Design Thinking • Enterprise Product Design • Workflow Optimisation • Cross-Functional Collaboration

EDUCATION

Government College of Engineering, Chandrapur

Bachelor of Engineering — Mechanical Engineering

2019 – 2022

Government Polytechnic, Aurangabad

Diploma — Automobile Engineering

2016 – 2019

CERTIFICATIONS

- Google UX Design Certificate — Coursera
- Figma Advanced Design Systems
- Nielsen Norman Group UX Foundations
