

Problem Statement

Jio World Centre hosts exhibitions, conventions, meetings, cultural events and more at high capacity. This requires large scale management in various activities for smooth execution. Many of these events require transport of heavy goods to and from the venue. Hence one of the major activities is Logistics Management.

To organise the transport of goods IN-and-OUT of the venue smoothly, on-time & without any hustle to exhibitors the management intends to do plan exhibitor's transportation in advance so operators/management at JWC can assist and handle the transport without hustle. Bay assignment of vehicles for loading/unloading needs to be convenient and near to the venue of the event. In case of multiple events at same time bay assignment needs to be proper in order to not disturb other events. Management need to have clear idea of bays availability at all times.

Goods transported can be heavy that might require special assistance to the event exhibitors which will be provided by the management at reasonable cost. To manage this properly advance planning of the transportation is essential.

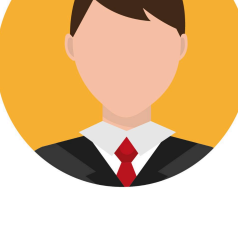

Observations

- Jio World Centre has multiple venues that can host multiple events at once.
- Bay management is essential to handle goods transportation of multiple events simultaneously.
- Management will provide resources for loading/unloading of heavy goods at cost.
- Advance planning of transport is essential to support goods handling.

Purpose (High Level Goals)

- Plan exhibitor's check-in and check-out for transportation in advance.
- Convenient bay allocation as per event venue.
- Live monitoring of bay status for smooth management.

Personas

 Operator 25 yrs, Basic education	- View scheduled bookings - Allocate bays, check-in & check-out - Spot booking - Utility check-in
 Administrator 45 yrs, M.B.A	- Manage events - Monitor, manage bay availability
 Exhibitor 45 yrs, Business-person	- Booking for transportation - Specifying resource requirements - View my bookings

Target Device

Tablet

- Easy to manage on the go.
- Practical for the environment our personas operate in.
- No learning curve.

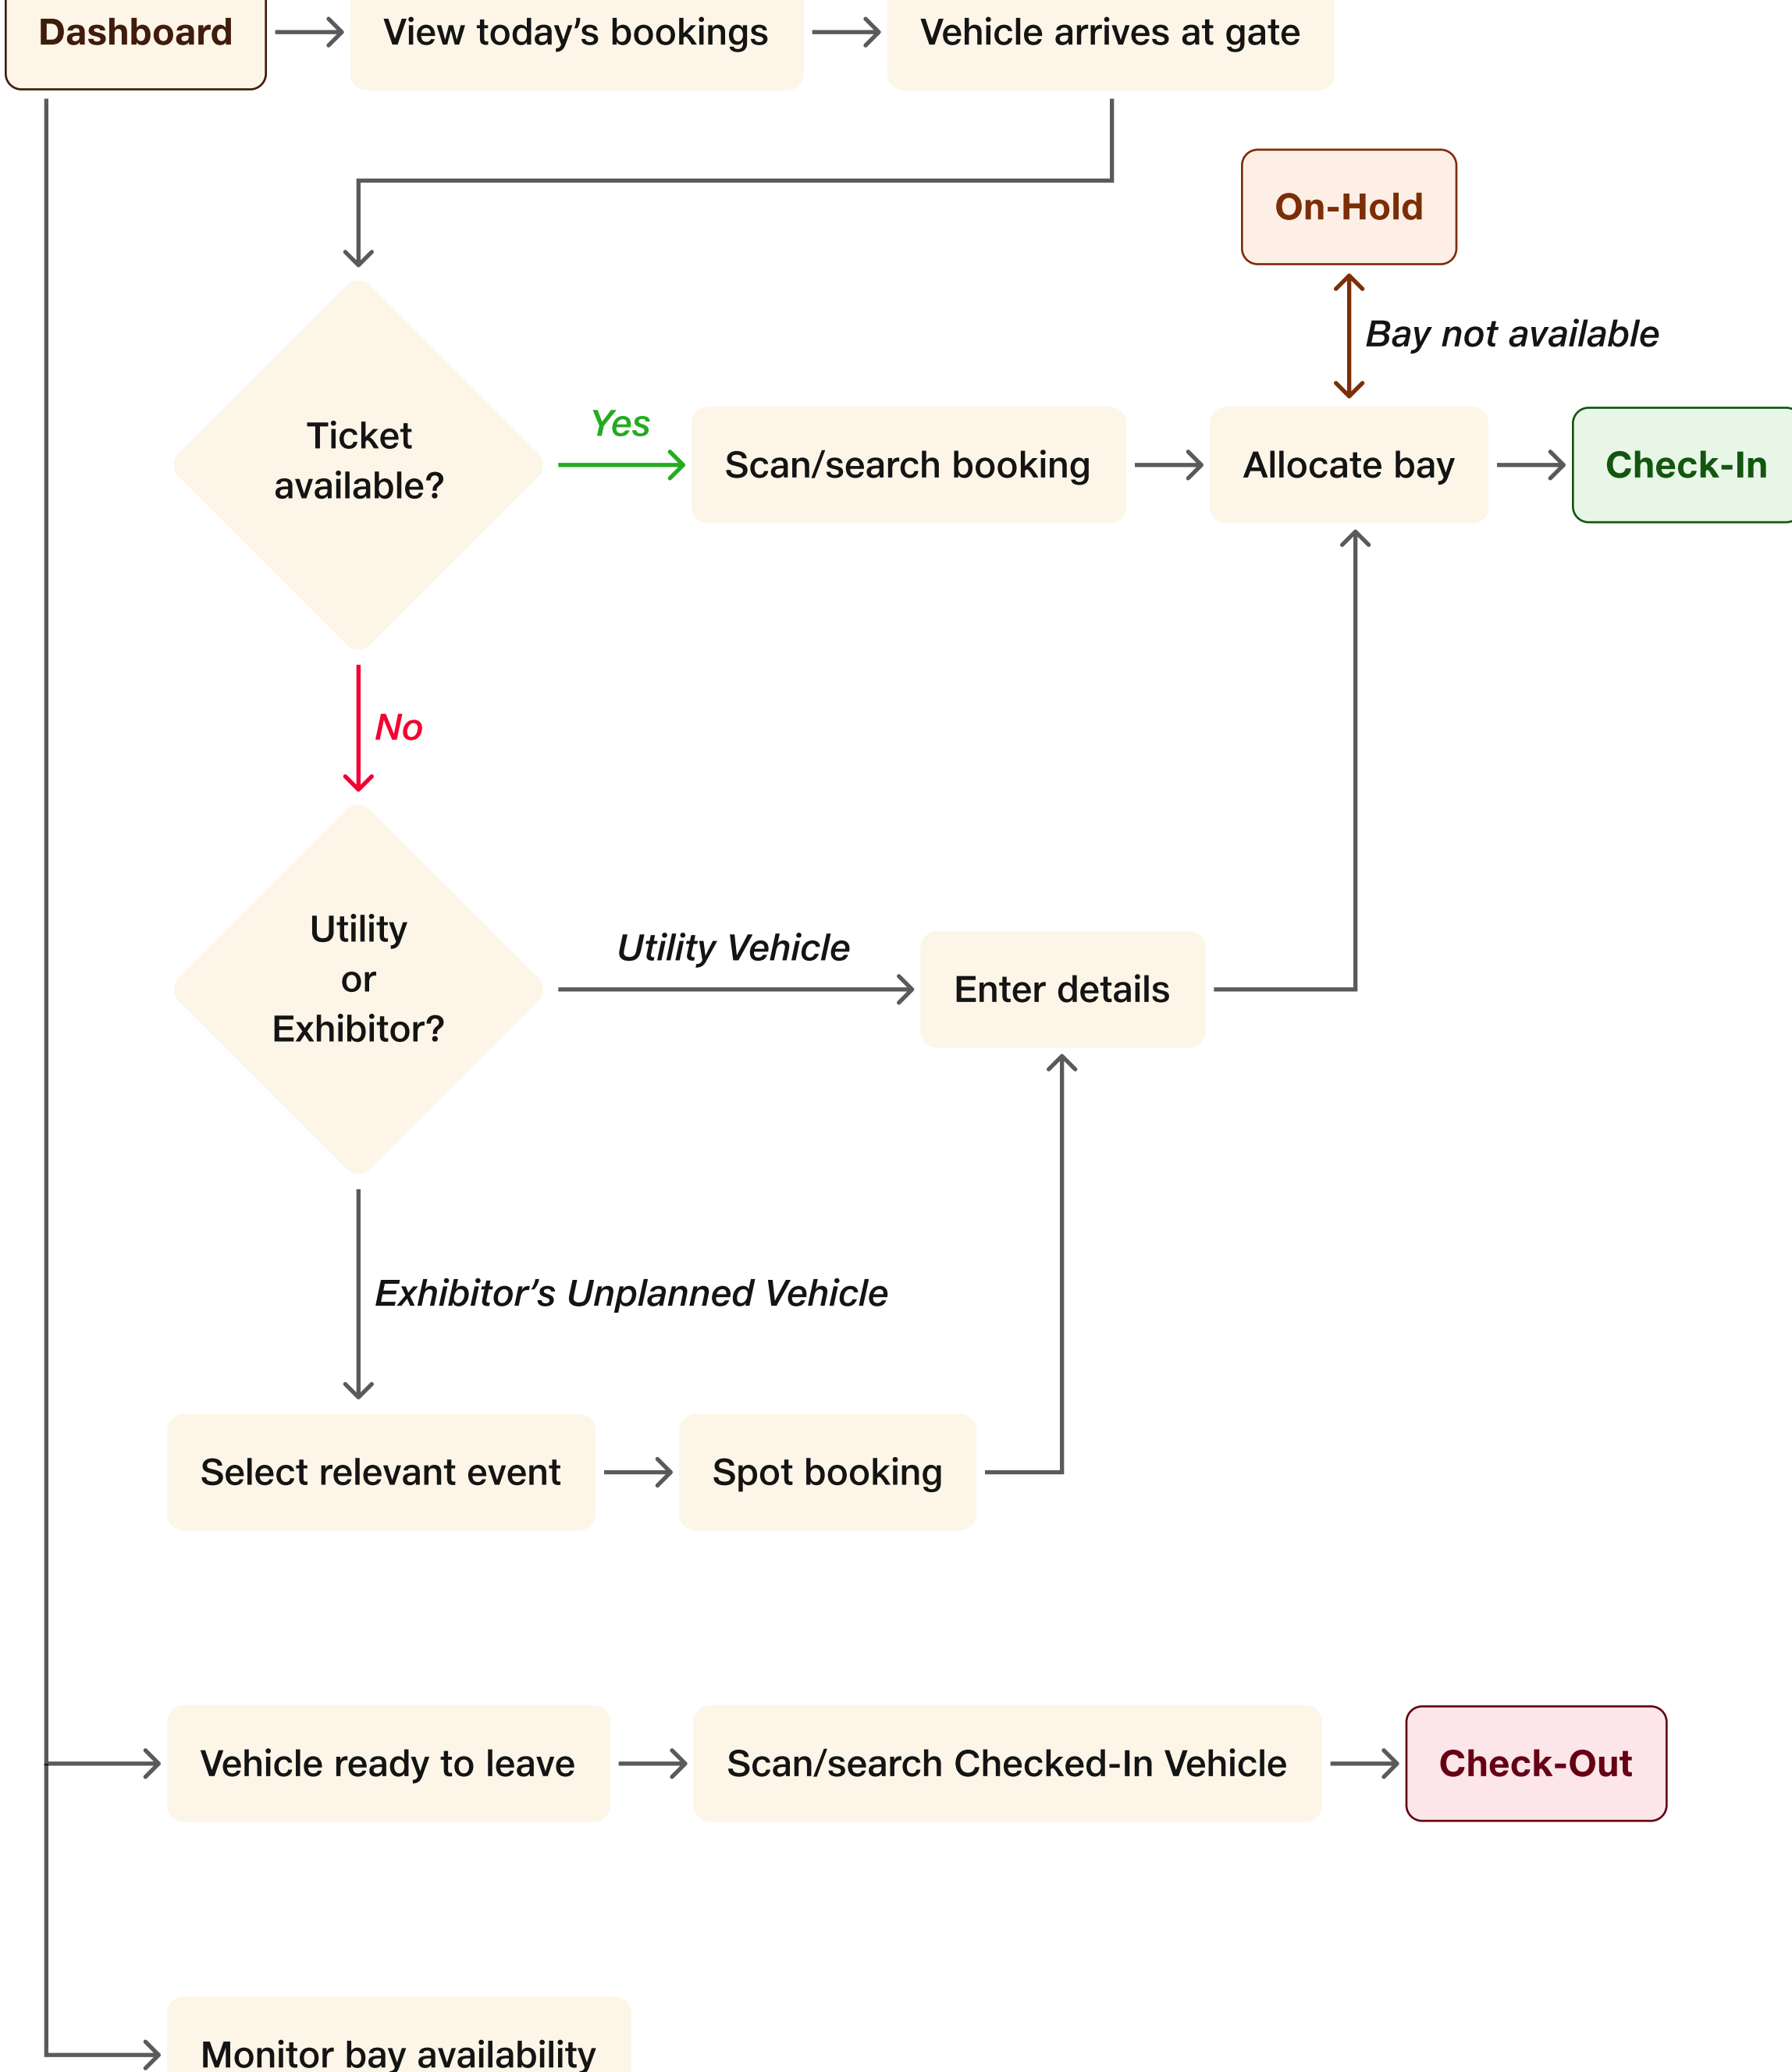

- Solution will support Mobile, Desktop as well (obviously)
