PROFESSIONAL SUMMARY

UI/UX Designer with **3+ years of experience** designing web-based products and platforms across procurement, logistics, warehouse management, and finance domains. Skilled in **end-to-end product design**, from user research and workflow definition to high-fidelity UI and developer handoff. Strong at simplifying **complex, data-heavy workflows** into intuitive user experiences. Proficient in **Figma** with hands-on collaboration experience with **Angular development teams**.

PROFESSIONAL EXPERIENCE

Associate UI/UX Designer

Jio Platforms Limited (JPL) — Navi Mumbai
October 2022 – Present

- Designed and enhanced **web applications and internal platforms** for procurement, supply chain, warehouse, and IT users
- Conducted **user research, stakeholder interviews, and requirement workshops** to identify pain points and translate them into UX solutions
- Created **user journeys, task flows, wireframes, and high-fidelity UI designs** using Figma
- Simplified complex, multi-step forms and workflows, improving **task completion speed and reducing user errors by ~25%**
- Improved **information architecture** for data-heavy screens, reducing cognitive load and improving usability
- Collaborated closely with **frontend developers (Angular)** to ensure feasible implementation and smooth design handoffs
- Designed **reusable components and patterns**, contributing to scalable and consistent UI experiences across products

KEY PROJECTS

Supplier Onboarding & Vendor Management Platform

Procurement | Finance

- Designed an end-to-end **supplier onboarding journey**, covering vendor creation, validation, approvals, and lifecycle management
- Structured large, complex forms into **guided, multi-step flows**, improving clarity and usability
- Designed UX for **duplicate detection, supplier blocking/unblocking**, and approval workflows
- Improved onboarding efficiency by reducing unnecessary steps and improving form clarity
- Worked closely with business and technical teams to align UX with compliance and operational needs

Warehouse Management System (WMS)

Logistics | Manufacturing

- Designed UX for **end-to-end warehouse operations**, aligned with real-world floor processes
- Created inbound workflows (goods receipt, quality check, storage) and outbound workflows (picking, packing, dispatch)
- Designed **warehouse configuration and master data screens**, including rule-based setups
- Optimized **data-heavy operational screens** to improve visibility, decision-making, and efficiency for users
- Ensured designs were scalable for different warehouse types and operational scenarios

SKILLS

Design & UX

- User Research & Stakeholder Interviews
- User Journeys & Task Flows
- Wireframing & Prototyping
- Interaction Design
- Information Architecture
- Usability & Workflow Optimization
- Data-Heavy & Form-Based UX
- Design Systems & Reusable Components

Tools

- Figma
- FigJam
- Adobe XD

Technical Knowledge

- Angular (Basic – UI collaboration & feasibility)
- React (Basic)
- HTML
- CSS

AI & Productivity Tools

- ChatGPT
- Figma Make
- Claude AI
- Cursor AI
- Lovable AI
- Readdy AI
- Antigravity

Domains

- Procurement
- Warehouse Management
- Logistics
- Manufacturing
- Finance
- Internal Tools & Platforms

EDUCATION

Bachelor of Engineering (Mechanical Engineering)

Government College of Engineering, Chandrapur

2019 – 2022

Diploma – Automobile Engineering

Government Polytechnic, Aurangabad

2016 – 2019
