SUMMARY

Product-focused UI/UX Designer with **3+ years of experience** specializing in complex **B2B enterprise applications** across supply chain, procurement, and finance. Proven ability to transform data-heavy, multi-role systems into intuitive interfaces, taking features from zero to launch while collaborating closely with engineering teams.

EXPERIENCE

Jio Platforms (JPL)

Associate UI/UX Designer

Oct 2022 - Present

- Conducted user research and stakeholder interviews to uncover pain points and define **actionable UX strategies** for internal business platforms.
- **Reduced cognitive load** and improved information architecture across multi-role enterprise systems.
- Collaborated directly with frontend developers using Angular to ensure **seamless technical implementation** and design feasibility.
- Built and maintained reusable UI components for the **internal design system**, ensuring consistency across the product suite.

Key Project: Supplier Relationship & Vendor Onboarding

- Led the end-to-end UX for a unified B2B supplier platform, successfully launching to **500+ suppliers** and resolving critical compliance gaps.
- Reduced supplier onboarding time by **78%** (from **14 days down to 3 days**) by converting complex processes into streamlined workflows featuring **AI-suggested forms** and smart defaults.
- Accelerated approval cycles by **5x** through the design of multi-level routing with auto-escalation, replacing manual email tracking.
- Architected workflow infrastructure integrating automated **API checks** for duplicate detection and **AML (Anti-Money Laundering) compliance**, achieving **full audit readiness**.
- Eliminated manual data entry errors completely by implementing **system-driven validations** and ensuring **100% transparency** with real-time status tracking.

Key Project: Warehouse Management System (WMS)

- Architected the user experience for **end-to-end warehouse logistics**, covering inbound/outbound operations, goods receipt, picking, packing, and dispatch.
- Designed **configuration-driven master data management** interfaces to ensure operational scalability across multiple warehouse types.
- Optimized data-heavy dashboards to enhance **real-time visibility** and decision-making for warehouse operators.

SKILLS

Design & Prototyping

Figma, FigJam, Adobe XD, Information Architecture, Wireframing, Data Visualization, Multi-Step Workflows

AI Tools

Anthropic Claude AI, ChatGPT, Cursor AI, Figma AI, Lovable AI, Readdy AI, Antigravity

Technical / Frontend

Angular (Basic), React (Basic), HTML, CSS

EDUCATION

2019 - 2022

Bachelor of Engineering in Mechanical Engineering

Government College of Engineering, Chandrapur

2016 - 2019

Diploma in Automobile Engineering

Government Polytechnic, Aurangabad
