SUMMARY

Product/UI UX Designer with 3+ years of experience designing enterprise SaaS platforms, operational workflow systems, and configuration-heavy applications at Jio Platforms. Specialized in supplier onboarding, warehouse management, procurement workflows, dashboard UX, and scalable design systems. Experienced in simplifying complex enterprise operations through AI-assisted design workflows, structured UX thinking, and close engineering collaboration.

EXPERIENCE

Jio Platforms Limited (JPL) <i>Product / UI UX Designer</i>	Oct 2022 – Present Navi Mumbai, India
- Led UX design for enterprise platforms including supplier onboarding, warehouse management, procurement operations, and workflow automation systems. - Re-architected complex multi-role workflows through scalable information architecture, operational visibility improvements, and structured interaction patterns. - Designed operational dashboards with contextual filtering, progressive disclosure, and real-time workflow insights for enterprise users. - Collaborated closely with Angular frontend teams using reusable components, design tokens, and implementation-ready developer handoff systems. - Leveraged AI-Driven Product Design using Cursor AI, Claude, ChatGPT, and Figma AI for rapid UX ideation, workflow generation, and UI iteration.	

KEY PROJECTS

Supplier Relationship & Vendor Onboarding Platform	2024 – Present
- Designed AML-compliant supplier onboarding workflows with API-driven verification for 500+ suppliers, reducing onboarding timelines from 14 days to 3 days. - Built multi-level approval routing and real-time workflow tracking systems that improved operational visibility and reduced manual dependency.	
Warehouse Management System (WMS)	2022 – Present
- Architected UX flows for inbound, outbound, inventory, picking, packing, dispatch, and warehouse configuration systems across enterprise logistics operations. - Redesigned operational dashboards using contextual visibility and workflow prioritization to improve real-time warehouse decision-making.	

SKILLS

Product & UX Enterprise UX • Product Design • Workflow Design • Dashboard UX • Information Architecture • Interaction Design
Enterprise Systems WMS • Procurement Platforms • Supplier Onboarding • Workflow Automation • Configuration-Driven Applications
Design Systems Component Libraries • Design Tokens • WCAG Accessibility • Angular Handoff • Design Documentation
AI-Assisted Design Cursor AI • Claude • ChatGPT • Figma AI • Prompt Engineering • AI Workflow Generation
Tools Figma • Adobe XD • Miro • HTML • CSS • Angular • React

EDUCATION

Government College of Engineering, Chandrapur <i>Bachelor of Engineering — Mechanical Engineering</i>	2019 – 2022
Government Polytechnic, Aurangabad <i>Diploma — Automobile Engineering</i>	2016 – 2019

CORE STRENGTHS

Enterprise Product Thinking • Complex Workflow Simplification • AI-Assisted UX Workflows • Scalable Design Systems
• Cross-Functional Collaboration
